

## A new Journal for a new Era

With the shocking news coming out of New York it is time for a local paper to bring you the truth of what is going on, without the influence from the Eastern States, misdirection from the Government or the half truths of the pious.

We must all stand together to protect Deadwood, the townsfolk and our way of life. We must stand, whether that be against the bands of soldiers rampaging across the State, the strange goings on in the woods or the politicians imposing laws on us.

Because of the threats to our life and liberty this journal, so named for our desire for a new way of life, will bring you the unadulterated truth.

---

## The Inquisition

As we have recently seen bands of soldiers have been roaming the land arresting suspected witches under the auspices of the Witchcraft Prevention Act.

There has been much confusion over the legal status of the Act. Through some industrious journalistic investigation at the Congressional Library and information provided by a well informed Senator we have discovered that this Act has not in fact been passed in to Law - rather it is an Act passed by a Special Senatorial Committee. It is unclear whether the Act is supported by the President or Congress. As such the legality of the Act is questionable at best.

However, the Generals operating the witch hunters, are operating under the instructions of the Special Senatorial Committee and therefore are acting within lawful orders.

Until the status of the legislation is confirmed it would be imprudent to antagonise the military at this time.

## Stoking the Fires

Some of you may have seen the fliers left around town. We are unable to identify the source of the article and given the uncertain status of the Witchcraft Prevention Act it is unclear whether this is some stoking a fire or someone with inside knowledge. Although we can not speak to its veracity the Deadwood Pioneer seeks to bring you the news without bias and so feel it is appropriate to reproduce the note below.

*We stand at the crossroads between what we feel is right and just and what others tell us is wrong and vile. One path leads to light the other leads down a very dark path.*

*Our friends and Neighbours have been attacked for simply being who they are or what they were accused of being at the behest of men and women far from here guided by fear and bigotry of that which they chose to not understand. Our town has been attacked our homes ransacked without the backing of a Lawful Mandate to do so.*

*Our lawfully elected Senators great men, men like Senator Huckabee of Georgia, Senator Kimes of Arkansas and Senator Thompson of Mississippi made a stand against this oppression.*

*They chose the path leading to the light. Remember they stood for us in that Senate not themselves but for us, they stood for us against Bigotry, they stood against hatred*

*and they stood for us against fear.*

*These men stood in the Senate representing us and were denied a voice for us! Were denied the right to speak for us! Were denied the right to express our views for us! Senator Kimes stood to protect us from a ravening private Militia, the Militia nothing more than a Lynch mob sponsored by corporate interest and its lap dog Northern Generals, this Lynch Mob tasked with routing out the so called undesirable and the unwanted in the South. In the South not the North. That's the key here.*

In OUR homes not their OWN! That's where these Brigands were to work in our homes.

Senator Kimes and Senator Huckabee took every step open to them, explored every avenue, to resolve this for us. They stood for us and were denied the rights they were due as our Senators.

Senator Thompson asked for discussion, and was denied

Senator Kimes asked for an Enquiry, and was denied, denied even the right to ask the question why. They even spoke to the men of the South in Service of our great nation to ask for their help.

Men and women like you, and me who joined up because they believed it was the right thing to do, they asked them to protect us. And for this, for trying to represent us for trying to protect us, from this Northern Militia this Lynch Mob, they have been branded outlaws and denounced as men who hate this Great Country. They stood for us!

I don't know where our Senators are now, I hope they are well and free and on their way back to us, on the way back home.

I fear they are Hounded by that unlawful Northern Lynch Mob, forced from safe haven too safe haven always looking over their shoulders and listening for the baying of the hounds, but I hope when they make it home to us.

And I trust and hope that we will welcome them with open arms, remember that they stood for us and still do. They were outlawed for protecting us these men we voted for, these men we sent to be a voice our voice in the North, these men spoke to us. They were protecting us now we need to protect them. It's what they've done for us Isn't it?
